A monthly report from the
Wright State University School of Medicine

October 1978

vitalsigns

This "Special Issue" of Vitalsigns is a reminder of the School of Medicine's unique interaction with the "community" in this area of Ohio.

We have said it before, but it bears repeating: Without the confidence and generous support of the people of southwest Ohio, your School of Medicine would not exist.

If you would like to receive regular monthly issues of Vitalsigns, without charge, please write to the Director of Communications (address on p. 16).

In our more enlightened age, I prefer to think that such scare tactics are both irrelevant and undesirable. Do not be misled, however--medical school hasn't gotten any easier.

Indeed, the pressures to learn and succeed are as intense today as they ever were. But in the brief history of educating medical students here at Wright State, we know that if you are diligent and conscientious, you will be here next year. Speaking on behalf of the faculty and staff, I can assure you that everything possible will be done to see that you are.

Allow me to share with you some of the activities of this past year which testify to the strength, stability, and vitality of our young school.

Our full-time faculty has grown to over 150 members. In addition to this full-time nucleus, we can count on the superb support of more than 700 voluntary clinical faculty members whose combined professional expertise makes our overall educational program as broadly-based as exists anywhere in the nation.

During the past year, three of our clinical departments have appointed new chairmen: Dr. A. Robert Davies was appointed Chairman of the Department of Medicine; Dr. John C. Gillen was named Chairman of the Department of Family Practice; and, in July, Dr. Samuel Pitner joined us as Chairman of the Department of Neurology. We are one of the few schools in the country in which every Departmental chairmanship is filled!

Along with these appointments of new chairmen, we have recruited a number of outstanding junior and senior faculty members, too extensive to individually mention, in such diverse areas as medical jurisprudence, emergency medicine, aerospace medicine, and a host of other specialties and subspecialties in the basic sciences as well as the clinical sciences.

Making 'Wright State' Synonymous with 'Excellence in Medicine' School's Growth, Community Involvement Highlighted by Dean John Beljan In Convocation Address

Text of Dr. Beljan's Sept. 8 Convocation Address

For many years, it was traditional on occasions such as this for Deans of professional schools to glare at the incoming class of freshmen and

say, threateningly: "Look carefully at the person seated on either side of you. By next year, one of you won't be here!"

Dr. Robert Suriano, Associate Dean for Student Affairs/Admissions, announced scholarship recipients for 1978-79 at the Third Annual Convocation, Sept. 8. See p. 10 for complete list.

Continued, p. 11...

Pruetts Present Dean's Photo to School

Family Practice Residency Approved for WSU/Hospitals

A new Integrated Family Practice Residency Program of the Wright State University School of Medicine Affiliated Hospitals has been approved and provisionally accredited for three years.

Designed to help alleviate the shortage of family practitioners in southwest Ohio, the new program was developed by Community Hospital of Springfield and Clark County, Greene Memorial Hospital (Xenia), Mercy Medical Center (Springfield), and the School of Medicine. The program's model group practice will be centrally based in Yellow Springs (the Yellow Springs Clinic).

Currently, the existing Family Practice Residency positions in the Dayton area are near saturation. The need for additional opportunities in Family Practice training will increase when the WSU School of Medicine graduates its first class in 1980, since Wright State is heavily oriented to primary care. In the meantime, recent graduates of other medical schools will comprise the first group of new Family Practice residents.

As is its custom, the Residency Review Committee of the Liaison Committee on Graduate Medical Education, the national accrediting body, will review the Wright State program approximately two years from now.

The Review Committee, which approved the WSU program, is made up of representatives of the American Academy of Family Physicians, the American Board of Family Practice, and American Medical Association Council on Medical Education.

At KMC ...

Dr. Torem Directs New Behavioral Medicine Center

People who suffer from such ailments as migraine headaches, chronic low-back pain, excessive sweating of the hands and feet, phobias, fears, bronchial asthma, and sleeplessness may benefit from a new service in the Dayton area.

Called the Behavioral Medicine Center, the new service is located at Kettering Medical Center and is

With the photo of the Founding Dean: l. to r., Mr. and Mrs. A.I. Pruett, Dean Beljan, Dr. Nicholas J. Thompson, Professor and Chairman of Obstetrics and Gynecology, and Dr. Frank Shively, Clinical Professor of Surgery.

To show their appreciation for Founding Dean John R. Beljan's work in guiding the growth and development of the WSU School of Medicine since 1974, Mr. and Mrs. A.I. Pruett presented a specially-commissioned color photograph of Dr. Beljan to

the School during the September Faculty Meeting.

The Pruett's are among the School's most outstanding supporters. The Fordham Library honors Mrs. Pruett's late husband and son, Thomas Fordham, Sr., and Thomas Fordham, Jr.

President Kegerreis Addresses Medical Society

WSU President Robert J. Kegerreis was the guest speaker for the Combined Meeting of the Montgomery County Medical Society-Hospital Staffs, Sept. 28, on the Wright State campus.

In his remarks--"Second Stage of the Great Experiment: Wright State in the Community"--Dr. Kegerreis discussed the University's long-range plans, as well as its impact, interaction, and involvement with the people and institutions in the Dayton-Miami Valley region.

Dr. Kegerreis also described the development of the School of Medicine and the other WSU Health

Sciences areas in the overall context of the University's missions of service, research, and teaching.

under the direction of Moshe Torem, M.D., Assistant Professor in the School of Medicine's Department of Psychiatry.

According to Dr. Torem, the service is based on the philosophy that high quality medical care is achieved through relating to a "whole" person who may have an illness, rather than to a sick organ or a disease itself.

"This holistic approach to patient care takes into account the various elements--psychological, socio-cultural, and biological--which contribute to the patient's illness," says Dr. Torem.

Using special biofeedback techniques, the treatment program will help patients become more aware of how certain bodily functions--for example, body temperature, muscle tension, mild perspiration, heart contractions, bowel contractions, and blood pressure--contribute to the onset, development, and recovery from the illnesses.

Midwest Anatomists Meet at Wright State

The School of Medicine hosted a major scientific conference, Oct. 6-9, when 125 professors from 12 states and 3 Canadian provinces gathered in Dayton for the 36th Annual Meeting of the Midwest Association of Anatomists.

Forty-five scientific presentations were given. A special symposium on "Current Concepts of Immunocytochemistry" was conducted by Dr. Virginia Pickel, Cornell University Medical College; Dr. Paul Nakane, University of Colorado School of Medicine; Dr. Ludwig Sternberger, University of Rochester School of Medicine; and Dr. Gwen Moriarity, Northwestern University Medical School. Dr. Liberato DiDio, the Medical College of Ohio at Toledo, was the Banquet Speaker.

Dr. Larry Ream, Assistant Professor of Anatomy at Wright State, served as chairman for the meeting.

GREENE MEMORIAL HOSPITAL INC.

Eighth in a Series

Our Partners in Medical Education

"The ideal cooperative is one in which all of the participants mutually benefit. We at Greene Memorial Hospital feel the affiliate program of the Wright State University School of Medicine is a model of such cooperation.

"Beyond the benefits accrued to the participating institutions, however, the major impact will be felt in our respective communities through improved community resources in health education and quality health care. In our own community, the medical school is visible through its Department of Pathology and its Department of Postgraduate Medicine and Continuing Education, which are based at Greene Memorial.

"Our community, in turn, has invested in its own future by contributing funds to construct our new Center for Health Education, enabling us to fulfill our commitment as an affiliate of the medical school.

"As the last remaining hospital administrator of those who participated in the initial meeting to discuss establishment of the WSU School of Medicine, it has been especially gratifying for me to watch it develop and grow."

--Herman Menapace, M.H.A.
Administrator
Greene Memorial Hospital
Associate Clinical Professor
Department of Community Medicine

Mr. Menapace

Felix Garfunkel, M.D., Associate Clinical Professor of Radiological Sciences, is Chief-of-Staff at Greene Memorial Hospital.

Richard Falls, M.D., Associate Professor of Family Practice, is Associate Director of the WSU/Affiliated Hospitals Family Practice Residency Program at Greene.

The new Center for Health Education at Greene Memorial Hospital was dedicated Oct. 2. The 15,000-sq-foot facility contains a 183-seat auditorium, classrooms, a medical library, meeting rooms, and the offices of the WSU Department of Postgraduate Medicine and Continuing Education.

Alvin E. Rodin, M.D., Professor and Chairman of the Department of Postgraduate Medicine and Continuing Education, is Director of Medical Education at Greene Memorial.

F. Lamont Jennings, M.D., is Professor and Chairman of the WSU Department of Pathology, which is also administratively based at GMH.

Postgraduate Medicine and Continuing Education Faculty Based at Greene

John Barton, Ph.D., Associate Professor and Vice-Chairman

Paul Carlson, Ph.D., Associate Professor

Anthony Parisi, Ph.D., Assistant Professor

Stephen Peterson, M.A., Instructor

An Important Message . . .

From the School's Foundation Director

Mrs. Joyce Young
Executive
Director
School of
Medicine
Foundation

The mission of the School of Medicine has been from its very beginning to fill the pressing need for more family physicians in southwestern Ohio. A recent HEW report stated that more than half of the City of Dayton is medically underserved, while people in our rural areas often have to travel long distances for medical care.

Providing Excellent Medical Education

Our mission is clear! It is to provide excellent medical education for students who live in Ohio and who want to give good medical care to the people of Ohio. Accordingly, the student's desire to practice medicine in Ohio is a great deal more important than his or her ability to pay tuition and fees.

Students Need Financial Aid

A variety of grants, loans, and scholarships help those students who need financial aid to complete their medical studies. The Office of Student Affairs is proud that it could give some help to all the students who need aid this year. The Office was able to help because of gifts ranging up to \$50,000, contributed by those who recognize the vital future benefits of the School for the people of Ohio.

Government Funds Are Decreasing

Next year the student body will again increase dramatically. At the same time, government funds for student aid are being decreased, and they have been a major source of student aid. It will be more and more difficult to meet students' needs for financial aid unless private contributions are increased significantly!

Convocation Address, continued

It was a great pleasure, in March, to announce the School's first endowed chair--the Eugene W. Kettering Professorship of Clinical Medicine--awarded to Dr. Albert A. Brust, a distinguished Dayton internist.

In May, we were gratified to receive two anonymous \$25,000 scholarships, named in honor of Dr. Robert M. Craig, another distinguished Dayton internist, and attorney Chester E. Finn, a prominent community leader.

Also in May, we successfully launched the Wright State University Academy of Medicine, a new professional organization, created to support the School of Medicine, with over 225 charter members. Its success was due in large part to the efforts of four of our senior voluntary faculty members (Drs. Raymond M. Kahn, Frank L. Shively, Jr., Sylvan L. Weinberg, and Richard A. DeWall) and the community of fine physicians in our twelve-county area.

Our School of Medicine thrives on its inter-relationships with the medical education, research, and patient care activities at seventeen federal and community hospitals and health care facilities in this part of Ohio. During the past year, our list of affiliated institutions has grown with the addition of the Maria-Joseph Center, the Otterbein Home, and the Western Ohio Regional Alcoholism Treatment Center.

This list of affiliated institutions is an impressive one, and includes Children's Medical Center...Community Hospital of Springfield...the Dayton Mental Health Center...the Dayton Veterans Administration Center...Dettmer Hospital...Greene Memorial Hospital...Good Samaritan Hospital...Kettering Medical Center...Miami Valley Hospital...Piqua Memorial Hospital...St. Elizabeth Medical Center...Stouder Memorial Hospital...and the USAF Medical Center at Wright-Patterson.

I wish to acknowledge each of these fine teaching institutions, because it is through their excellent cooperation and support that this School has come so far, so quickly. Few medical schools in this country can boast of a more impressive array of affiliated teaching hospitals, and the teaching resources they represent.

We have continued to move ahead with the development of new graduate house officer training programs in the Dayton area. This past year, we received approval for new residencies in Psychiatry, Dermatology, and

Outstanding Teachers Recognized During Convocation Program

The "No Doze" Awards for Teaching Excellence are presented each year during Convocation ceremonies.

Top Photo The Class of 1980 selected co-winners: Dr. Al Batata (l.), Professor of Pathology, and Dr. Elizabeth Wales, Associate Professor of Psychiatry. Evan Cantini (r.), Class President, made the presentation.

Bottom Photo Dr. Robert Weisman (l.), Professor of Biological Chemistry, was chosen by the Class of 1981. Class President Rudy Arnold congratulates Dr. Weisman.

Aerospace Medicine. The Aerospace Medicine Residency is the only civilian program of its kind in the nation. We have applied for, and expect approval of, other new residencies in Family Practice, Emergency Medicine, and Surgery.

Our faculty has received continued major research grant support this past year. In addition, 26 of our younger researchers recently received NIH seed monies to help launch various biomedical projects. Our contributions to medical research are significant and important, as measured by both grant support and research publication.

This School was built on the concept of using existing community resources, and that idea burns as brightly today as it did five years ago. During the past year, we have worked closely with several of the teaching hospitals to bring to fruition additional ambulatory teaching facilities from resources provided by the state of Ohio. In addition, architectural design is underway for the on-campus Ambulatory Care Center, and the first expansion of the Medical Sciences Building designed to accommodate the needs of our enlarging student body.

Yes...it has been another year of continuing and maturing growth. At the same time, we have seen signs of new growth in many areas, and we've planted fresh seeds in others.

The growth and development of all of these programs and resources would be of little value, however, if we lacked that essential ingredient: students. Students are the reason this school exists, and it is exciting to realize that, with the 76 students whom we welcome today, our total enrollment has doubled and is now 157.

We have every reason to believe that, by 1980, our entering class will number the 100 students planned and, four short years later, that 400 students will comprise our undergraduate medical student body.

In closing, I am confident that the future holds great things for this School of Medicine as well as for Wright State University.

As the recently-appointed Vice President for Health Affairs, I can assure you that I intend to make the words "Wright State" synonymous with "excellence in medicine and the health-related fields."

They Were Strangers in So Many Ways

Both of us were strangers in a new country. She is Catholic, and I'm an Orthodox Armenian. She is Filipino, while I was born and raised in Bulgaria. She is one of twelve children, I am an only child.

--Haig Tozbugukov, M.D.

The Doctors Tozbugukov (Toz-boya-koff): Haig and Carmelita, both 31.

Under a cover of darkness, in 1972, he left Bulgaria, walked across the Yugoslav-Italian border, and, in his own words, "never looked back. I left almost empty-handed, knowing I could never return to my parents or my homeland." With assistance from the World Council of Churches, he eventually landed in the U.S.

Her homeland, on the other hand, would welcome her back. She arrived in the U.S. in 1971, spent a year in Detroit as an intern be-

fore going on to New York for her residency training in Anesthesiology. "My government was concerned that too many medical graduates were leaving the country," she says. "They were worried about the 'brain drain' and wanted Filipino doctors to practice in their own villages. I had planned to do this, but then I met Haig."

They discovered one another at Montefiore Hospital and Medical Center in the Bronx, New York. According to Haig, "We had several things in common, not the least of these being the fact that we were foreign doctors, in a strange land,

working hard to become anesthesiologists." Another thing they had in common were fathers--each of whom was an attorney in his respective country.

Married in late 1975, the Tozbugukovs left New York a year later so that Haig could complete his last year of residency at Children's Hospital in Boston (Carmelita had already completed hers). By 1977 they were in Washington, D.C., serving as anesthesiology instructors, he at Georgetown University Hospital, she at Howard University Hospital. "One day," Haig recalls, "we received a call from Dr. Andrew Forbat, a friend from our days at Montefiore Hospital, saying that he had joined the Wright State Department of Anesthesiology. He wanted us to come to Dayton to interview for possible positions in this new School of Medicine."

They set a January 1978 date for the interview, arriving "in the middle of the largest blizzard Dayton has ever known," Haig says. "What an introduction to Ohio! We returned to Washington as quickly as we could and didn't give a lot of thought to coming back to Dayton until we received another call from Dr. Alan Shafer [Pediatric Surgeon and Chief-of-Staff at Children's Medical Center]. It's extremely unusual for any surgeon to ask an anesthesiologist to consider a position," says Haig, good naturedly, "so we were both impressed, and we agreed to take another look at Dayton and Wright State."

Apparently the second visit was less traumatic, for this summer, the Tozbugukovs were each appointed Assistant Professors in the School's Department of Anesthesiology.

Along with Gary, their two-year-old son, Drs. Haig and Carmelita Tozbugukov are now living in Centerville, a Dayton suburb located somewhere between Plovdiv, Bulgaria...and Pangil, the Philippines.

'Horizons in Medicine' for Secondary Students

Secondary students who dream of a career in medicine or one of the other health professions may benefit from a new program being prepared by the School of Medicine and Dayton-area high schools.

Called "Horizons in Medicine," the new program will increase educational opportunities for qualified minority students and others who have social, cultural, or economic disadvantages by preparing them to enter a college pre-medical or

health sciences curriculum.

The program--to become operational in 1979 with about 20 participants--will offer students six-week laboratory and classroom experiences at the School of Medicine; an opportunity to earn extra high school credits and some college credit; possible part-time summer employment in medical and related health-care areas, and a variety of other opportunities designed to prepare Dayton-area youths for a medical career.

Research and photographs by Ruth Hardin and Barbara Borders, School of Medicine Communications Department.

The Donated Body . . .

'The Single Most Significant Gift'

"Most people feel that donating their body to the School of Medicine for anatomical and physiological study is a very useful thing to do," says Frank Nagy, Ph.D., Associate Professor of Anatomy and Director of the Donated Body Program at WSU.

Dr. Frank Nagy

"A donation like this," he says, "is probably the single most significant gift a medical student gets in the four years he or she is here at Wright State."

According to Dr. Nagy, "Many people will call and enroll the entire family. Husband, wife, and children. For the most part, the older people who donate have come into contact with physicians for several years. They have either been ill in a hospital or received care of one sort or another, and they feel they want to do something in return."

Explaining other reasons why people donate, he notes, "Many people donate because funeral expenses are high and they are looking for other alternatives. Primarily they want to spare their families from making all of the arrangements. But most donate because they want to do something that is useful to mankind."

The names of all donors remain anonymous. "Many people choose to remain anonymous because of the association years ago with the indigent donors who perhaps had no family ties. This is not the case today. But in the minds of many older people this is still the way they think of it, and for that reason they choose to remain anonymous," he explains.

Voluntary Clinical Faculty

Lloyd G. Phillips, M.D. (Meharry Medical College, 1966), Ph.D. (University of Minnesota, 1973), Voluntary Assistant Professor of Anatomy, Assistant Clinical Professor of Surgery.

"Dr. Phillips spends at least one afternoon each week teaching in our Gross Anatomy Laboratory. While he is new to Wright State, he is very active in the Anatomy and Surgery areas, where he participates fully in academic activities and is highly respected by students and faculty."

--Joseph Zambernard, Ph.D.
Director
Program in Anatomy

At Otterbein Home . . .

Students Learn about Elderly Patients

Earlier this year, the Otterbein Home in Lebanon, Ohio, became affiliated with the School of Medicine. The August issue of *Home Echoes*, a publication for residents and staff, included a column by Wilford E. Chaney, M.D., announcing that some WSU medical students would soon be working there. Excerpts from Dr. Chaney's article are reprinted here.

Dr. Chaney is a member of the Board of Trustees and the former Acting Medical Director of Otterbein Home. Dr. Peter Mulder, referred to in the article, is Medical Director at the Home. Both are Assistant Clinical Professors in the WSU Department of Family Practice.

Approximately 500 to 600 people a year sign up for the WSU program. To date, there are nearly 1,400 people who have enrolled in the Wright State program, which began in 1975, as a successor to Kettering Medical Center's program.

By Linda Smith, Editor of *The Wrightstater*, Wright State's alumni magazine.

Several concerned doctors in the Dayton area have been formulating a plan at the new Wright State Medical School to provide training in and exposure to the unique medical and socio-economic problems of the elderly to the medical students. Dr. Mulder and I have been involved with this committee over the past three years and are happy to announce some of these young doctors will be spending some time with us and other Otterbein personnel in the near future.

This is a situation in which every one involved should win. We as doctors and other medical staff workers in all areas can share with the students our experience and expertise. The students will bring to us knowledge of the latest medical advancements. The residents will, however, be the greatest winners because such exchange will surely lead to better future medical care in all areas for the older patient.

I have no doubt these young alert minds will add many ideas to improve care at Otterbein and other locations in the greater Dayton area.

Profiles

Dr. Haynes

Ralph E. Haynes, M.D., has been named Professor and Vice-Chairman of the Department of Pediatrics. Since 1965, he has been on the faculty at the Ohio State University College of Medicine, most recently as a Professor of Pediatrics.

A native of West Virginia, Dr. Haynes was a pre-medical student at the University of Richmond (Virginia) from 1943-1945. He received his M.D. degree in 1949 from the Medical College of Virginia. After serving with the First Marine Division in Korea, he entered general practice (1954-1955), served a pediatric residency at Children's Hospital in Cincinnati (1955-1957), and was a practicing pediatrician from 1957-1965, when he joined the Ohio State faculty.

Dr. Haynes is the author of some 35 articles in specialized journals and has contributed chapters to four medical texts. His major research interest is pediatric infectious diseases. He was certified in 1958 by the American Board of Pediatrics and belongs to numerous professional societies, including the American Academy of Pediatrics and the American Society of Microbiology.

Dr. Haynes has located his office at Children's Medical Center, the

Dr. Payne

administrative base of the School's Department of Pediatrics.

Charles B. Payne, M.D., has been appointed Associate Professor in the Department of Medicine. Dr. Payne comes to Wright State from Cleveland, where he served as an Assistant Professor at Case Western Reserve University School of Medicine and as Assistant Chief of the Pulmonary Section at the Cleveland VA Hospital.

Dr. Payne received his B.S. degree from Yale (1952) and his M.D. from the University of Pennsylvania (1956). He interned at The Cooper Hospital, Camden, N.J. (1956-1957), served in the Army Medical Corps (1957-1961), and completed his residency in medicine at Cleveland Metropolitan General hospital (1961-1964).

From 1966 until 1972, Dr. Payne was in private practice in Cleveland. He joined the University of Maryland School of Medicine faculty for three years (1972-1975) before returning to Cleveland.

Dr. Payne is a Fellow of the American College of Chest Physicians. He holds membership in the American Federation for Clinical Research,

Dr. Saber

the American Thoracic Society, and many other professional organizations.

In addition to a number of papers published in specialized journals, Dr. Payne is the co-author of the chapter "Evaluation of Pulmonary Disability" in Textbook of Pulmonary Diseases, 3rd Edition.

Fay A. Saber, J.D., M.P.H., has joined the Department of Medicine in Society as an Assistant Professor. She previously served as a Teaching Assistant in Health Law at the Harvard School of Public Health and as a lecturer in Legal Medicine at Tufts University Medical School.

A 1973 graduate of Providence College, Dr. Saber received her law degree from Boston College Law School (1976) and her Master of Public Health degree from Harvard (1977).

Dr. Saber has published some half-dozen studies in the area of medical jurisprudence. Her professional affiliations include membership in the American Bar Association, the American Public Health Association, and the American Society of Hospital Attorneys.

Category I Accredited Upcoming CME Programs

For additional information, please contact Ms. Arlene Polster at 429-3200, Ext. 377, Dept. of Postgraduate Medicine and Continuing Education.

Nov. 11-12

Primary Care: Clinical Focus on Aging

Chairman: Sherman Kahn, M.D.

Site: Sheraton Dayton Downtown

Fee: WSU Faculty - \$75

Others - \$100

Credit: 11 hrs. Category I/AMA

Applied: 11 hrs. Prescribed AAFP

Dec. 2-3

Symposium on Stress Management

Chairman: Barry Blackwell, M.D.

Site: The Ramada Inn

Fee: WSU Faculty - \$75

Others - \$100

Credit: 12 hrs. Category I/AMA

Applied: 12 hrs. AAFP

MARK YOUR CALENDAR

Feb. 7

Renal Stone Symposium

Chairman: H. Allan Feller, M.D.

Site: Sheraton Dayton Downtown

Feb. 28

7th Annual Cardiology Forum

Chairman: Benjamin Schuster, M.D.

Site: Kettering Medical Center

For the Record

ANESTHESIOLOGY

...NORMAN H. BLASS, M.D., Associate Professor, presented "Anesthesia for Cesarean Section" to the Detroit-McComb County Medical Association, Sept. 11.

...R. BRYAN ROBERTS, M.D., Professor and Chairman, lectured on "The Prevention of Aspiration During Anesthesia" and "The Why and When of Neonatal Resuscitation" as Visiting Professor at the University of Cincinnati Medical Center, Sept. 6.

COMMUNITY MEDICINE

...CARL JELENKO III, M.D., Professor, and MOGAN L. WHEELER, B.A., Assistant Director for Research in Emergency Medicine, "Shock and Resuscitation II: Volume Repletion with Minimal Edema Using the 'HALFD' Method," JACEP (September 1978).

FAMILY PRACTICE

...NOEL J. WATSON, M.D., Assistant Professor, presented "How to Get a Clinical Research Project Started"

March 7

Infectious Diseases

Chairman: Barbara A. Beeler, M.D.

Site: Sheraton Dayton Downtown

March 28

Practical ENT for the Primary Care Physician

Chairman: Robert Goldenberg, M.D.

Site: Sheraton Dayton Downtown

April 11

Sports Medicine Seminar

Chairman: John Gillen, M.D.

Site: Sheraton Dayton Downtown

April 25

Alcoholism Intervention

Chairmen: Harvey Siegal, Ph.D.

Richard Falls, M.D.

Site: Sheraton Dayton Downtown

May 5-6

Third Annual Update on Pain

Chairmen: Carl Jenkins, M.D.

R. Bryan Roberts, M.D.

Site: Kings Island Inn

Beatrice Lacey, M.A., Fels Professor in Psychiatry, was installed as the 19th President of the Society for Psychophysiological Research at its annual meeting in Madison, Wis., Sept. 15-19.

The Society, founded in 1960, is a major international organization devoted to interdisciplinary research at the interface of physiology and behavioral science. Twenty different countries are represented in its membership, which includes psychologists, physiologists, physicians, and biomedical engineers.

at the 28th Annual Scientific Assembly of the Ohio Academy of Family Physicians Meeting, Columbus, Aug. 4-5.

MEDICINE IN SOCIETY

...HARVEY A. SIEGAL, Ph.D., Associate Professor, recently presented "The Use and Abuse of Illicit Drugs in Rural Families" at the 1978 annual meeting of the American Sociological Association, San Francisco.

OTOLARYNGOLOGY

...ROBERT G. GLASER, Ph.D., Assistant Clinical Professor, presented a course on vestibular function assessment to the Graduate Faculty and students in audiology at Ohio University, Athens, Oct. 11-12.

PATHOLOGY

...AL BATATA, M.D., Associate Professor, and ANTONIO PARISI, Ph.D., Assistant Professor (Postgraduate Medicine and Continuing Education), recently conducted the workshop, "How to Develop a Program to Help Faculty Improve Their Teaching Effectiveness," at the national meeting of the Group for Research in Pathology Education, Cincinnati.

PEDIATRICS

...THOMAS R. TEGENKAMP, Ph.D., Associate Clinical Professor, "Prenatal Detection of a Familial t(1;7) (p32;p13) Translocation Transmitted in a Pregnancy Occurring After Administration of Clomiphene and Conjugated Estrogens," Communications in Brief (August 1978).

PHARMACOLOGY

...ALBERT E. LANGLEY, Ph.D., Assistant Professor, "Enhanced Exocytotic Release of Norepinephrine Consequent to Nerve Stimulation by Low Concentrations of Cyclic Nucleotides in the Presence of Phenoxybenzamine," The Journal of Pharmacology and Experimental Therapeutics (May 1978).

...ROBERT W. GARDIER, Ph.D., Professor, "Dopaminergic Mechanisms" (a symposium co-chaired by Dr. Gardier) published in Federation Proceedings (August 1978).

PHYSIOLOGY

...ALAN TUCKER, Ph.D., Assistant Professor, presented "Histamine and Histamine Receptors in the Pulmonary Circulation" at the annual meeting of the Council on Circulation of the American Heart Association, Snowmass, Colo., in August.

PSYCHIATRY

...BEATRICE C. LACEY, M.A., and JOHN I. LACEY, Ph.D., both Fels Professors, have recently been made Fellows of the Academy of Behavioral Medicine Research... Also, they participated in the symposium, "Brain Mechanisms Integrating Behavior and Physiologic Response Patterns," at the annual meeting of the Society for Psychophysiological Research, Madison, Wis., Sept. 15-19. John Lacey presented "Basic Neurophysiological Plans for Response Patterning" and Beatrice Lacey presented "A Personal View of the Implications of Situation-Specific and Individual-Specific Response Patterns for the Study of Brain Mechanisms"...The Laceys also attended meetings of the American Psychological Association, Toronto, Aug. 28-Sept. 2.

RADIOLOGICAL SCIENCES

...ALAN ASHARE, M.D., Associate Professor and Chairman, presented "Uniformity Correction Methods and Clinical Imaging" and participated in a panel discussion at the Community Hospital Nuclear Medicine 1978 meeting, Cincinnati, Sept. 30... Also, he presented "Performance Evaluation, Information Theory and the Expanded Decision Matrix" at the World Federation of Nuclear Medicine and Biology meeting, Washington, D.C., Sept. 17-21.

On Call 1978-1980, the second edition of the WSU School of Medicine "catalogue," was published recently and is available upon request. The first edition (1976) received the First-Place Award, "for distinguished achievement," from the National School Public Relations Association.

The new 80-page book provides detailed information about the School's departments, programs, curriculum, admissions procedures, and other areas of interest to prospective students, faculty, legislators, foundation officers, Friends of the School, and others.
